## Overview

This release is an update to 16.10.x following 16.10.1 maintenance release and the subsequent 16.10.2 and 16.10.3 patch releases of the VAT Reporting application.

## Change Log

Ref.	Description
VR-1310	In 16.10.1 there was a bug which stopped new VAT Codes from working. This is now fixed. If you have created VAT Codes in 16.10.x please check they are working correctly, or recreate them.

## Upgrade Procedure

This section provides details on how to update to the latest version. For the purposes of this documentation, we assume that you have an existing installation and you have the necessary access privilege to perform the upgrade.

## Download

The latest version of VAT Reporting is available here:

<http://www.vatat.com/installation/VATReporting.html>

## Database Back Up

Before installing the update of VAT Reporting, ensure you have closed any running VAT Reporting windows, and take a full backup of the SQL Database. This can be done in the **SQL Server Management Studio**, from the database right-click menu **Tasks > Back Up...**
