Overview

This release is a small update to the 16.9.1 maintenance release of the VAT Reporting application. It includes all the changes in 16.9.1 please refer to the 16.9.1 Release Notes for full details.

Change Log

Ref.	Description	Impact
VR-913	In a previous release we introduced a feature which checked and corrected the 'sign' (-/+) for Credit Documents; however, this change was implemented and include SAP documents. SAP documents already delivered with the correct sign extracted, so in this patch we have excluded SAP documents from the feature.	Low – Reporting Check updated behavior for SAP documents.

Upgrade Procedure

This section provides details on how to update to the latest version. For the purposes of this documentation, we assume that you have an existing installation and you have the necessary access privilege to perform the upgrade.

Download

The latest version of VAT Reporting is available here:
