## Highlights

### All countries – Intrastat – Nature of Transaction

We have improved the way we handle this field. From 2022, this info has to be provided by the user, we have removed the automatic conversion to the most standard available code. We have also removed the automatic conversion of old codes into others more updated and its grouping. Finally, we have also restricted the list of accepted codes, in accordance to the lists published per country. In case the system detects a non-official code, the document will not pass validations. The list of jurisdictions for which this rule has been applied is Austria, Belgium, Bulgaria, Cyprus, Croatia, Czech Republic, Denmark, Estonia, Finland, Germany, Netherlands, Northern Ireland, Sweden.

The latest version of the Inbox Monitor is available here:

### Database Back Up

Close all running VAT Reporting windows and take a full backup of the SQL Database. This can be done in the **SQL Server Management Studio**, from the database right-click menu **Tasks > Back Up**.

### Stop Inbox Monitor & SII Processor Scheduled Task

Before installing the update of VAT Reporting stop the Inbox Monitoring Service and check there are no RCCL.exe processes still running and stop the Windows Scheduled Task if you are using SII.

### Install

Run the installer exe.

### Start Inbox Monitor

Start the Windows service, and then in VAT Reporting use the File > Send test file... and confirm the inbox is up and processing. This also handles any database upgrade.

### Start SII Processor Scheduled Task

Re-enable the Windows Scheduled Task (if you are using SII).

## VAT Reporting is now ready for use!
